PROFESSIONAL SUMMARY

Motivated third-year Software Engineering student at Jimma University with a strong passion for programming, web development, and cybersecurity. Adept at building structured, responsive web interfaces and solving real-world problems through code. A continuous learner who believes in "learning by doing" to improve technical skills and practical experience.

EDUCATION

Jimma University | Jimma, Ethiopia
Bachelor of Science in Software Engineering | Expected Graduation: 2029

- **Academic Level:** Third Year
- **Relevant Coursework:** Database Fundamentals, Programming Concepts, Linux/Command Line Basics.

TECHNICAL SKILLS

- **Web Development:** HTML, CSS, Bootstrap (Responsive Design)
- **Programming Languages:** C++, Python (Basic Programming)
- **Databases:** SQL (Database Fundamentals)
- **Tools & Systems:** Git & GitHub (Version Control), Linux (Command Line Basics)

AREAS OF FOCUS

- **Web Development:** Creating structured and responsive websites using modern web technologies.

- **Software Development:** Building software solutions and learning core programming concepts using C++ and Python.
- **Cybersecurity:** Exploring Linux environments, cybersecurity fundamentals, and practical security challenges.

PROJECTS

Visit Ethiopia | Web Development

- Designed and developed a tourism website to introduce Ethiopia's beautiful destinations, culture, historical places, and tourist attractions.
- Built a fully responsive web interface using HTML, CSS, and responsive design principles.
- Technologies used: HTML, CSS, Responsive Design.

Linux Tasks (Practical Assignment) | System Administration

- Completed practical assignments focused on working with files and directories in a Linux environment.
- Managed file permissions, combined file contents, and executed basic to intermediate Linux commands.
- Technologies used: Linux, Bash Commands, Git.

INTERESTS & FOCUS

- **Web Technologies:** Passionate about building clean, functional user interfaces.
- **Problem Solving:** Enjoy tackling algorithmic challenges and logical problems.
- **Continuous Learning:** Actively exploring new technologies and security practices.
